VASAVI MADAPANI

Software Engineer | .NET, C#, ASP.NET Core | Software Product Development | AWS

+91 6303601036 | vasavimadapani@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience in software product development on the Microsoft .NET platform, including C#, ASP.NET, and .NET Core. Strong technical ownership of individual feature areas within enterprise product platforms, working across parallel release cycles in Agile teams distributed across multiple geographical locations. Proven ability to translate stakeholder requirements into scalable, maintainable solutions using RESTful APIs, SQL Server, PostgreSQL, and AWS cloud services. Skilled in design patterns, Git-based configuration management, and API testing with Postman. Strong written and verbal communication skills, with experience coordinating directly with cross-functional and US-based stakeholder teams. Recognized with multiple client and company awards for reliability, ownership, and delivery quality.

CORE TECHNICAL SKILLS

Microsoft .NET Platform: C#, ASP.NET, ASP.NET MVC, .NET Core, Entity Framework

Product Development: Feature ownership, parallel release cycles, requirement analysis, Agile/Scrum delivery

Web Services & APIs: RESTful API Design, Web Services, Postman (API testing), Microservices, WCF

Databases: SQL Server (SSMS), PostgreSQL, Stored Procedures, Query Optimization, Database Design

Cloud: AWS (Amazon Web Services)

Architecture & Design: Design Patterns, Object-Oriented Design (OOP), Data Structures & Algorithms

Configuration Management: Git, GitLab, GitHub, Azure DevOps

Frontend: Angular, JavaScript, HTML5, CSS3

Testing: Unit Testing, Selenium (Automation), Postman

Collaboration Tools: Jira, cross-geography team collaboration

AI-Assisted Development: GitHub Copilot, Cursor AI, Claude

Tools & IDEs: Visual Studio, Visual Studio Code, SSMS

PROFESSIONAL EXPERIENCE

Software Engineer — *Capgemini* Nov 2024 – Present

Client Engagement: Smith+Nephew — Renasys Edge Connect Platform Nov 2025 – Present

Technologies: *.NET, C#, AWS, Microservices, GitLab, Jira, Postman, Cursor AI*

- Own a key functional feature area of the **Renasys Edge Connect** product, driving backend design, implementation, and delivery independently across parallel release cycles.
- Develop backend microservices using **.NET** and **C#**, following modern product development processes and cloud-native architecture practices.
- Design, develop, and maintain **RESTful APIs** and **web services**, using **Postman** for endpoint testing and validation.
- Build and integrate cloud-based solutions using **AWS** services within a distributed microservices ecosystem.
- Interact directly with product managers, QA, DevOps, and Business Analyst stakeholders across geographically distributed teams to clarify requirements and deliver end-to-end product features.
- Participate in code reviews and merge-request approvals using **GitLab** and **Jira**, applying **design patterns** and Agile development best practices.
- Leverage AI-powered development tools such as **Cursor AI** to accelerate code reviews and improve overall code quality.
- Contribute to architecture discussions and production troubleshooting, continuously improving service performance and reliability.

Client Engagement: Anaqua — Intellectual Property Management Platform Nov 2024 – Nov 2025

Technologies: *.NET Core, C#, ASP.NET, Angular, SQL Server, Selenium*

- Developed and maintained backend modules using **.NET Core** and **C#** for a large-scale, multi-tenant Intellectual Property Management product serving enterprise clients across geographies.
- Owned feature-level enhancements end-to-end — from requirement understanding with stakeholders to design, coding, testing, and deployment.

- Designed and consumed **RESTful APIs** and **web services** to enable seamless communication between frontend and backend systems.
- Wrote and optimized **SQL Server** queries, schema updates, and data validations using SSMS, applying sound **design pattern** principles.
- Contributed to **Selenium**-based test automation for USPTO-related workflows, improving process efficiency and reducing manual QA effort.
- Collaborated with senior developers and **US-based teams** across Agile/Scrum ceremonies (sprint planning, stand-ups, reviews) spanning parallel release cycles.
- Explored AI-assisted development using **GitHub Copilot** and a Claude model during a proof-of-concept, improving coding efficiency and solution exploration.
- Followed secure coding practices and SDLC standards throughout feature development and enhancement work.

PERSONAL PROJECT

E-Commerce Web Application — *Independent Product Build*

Technologies: *ASP.NET MVC, C#, SQL Server, HTML5, JavaScript, Postman*

- Built a full-stack e-commerce product using **ASP.NET MVC**, **C#**, and **SQL Server**, including user authentication, product catalog management, shopping cart, and order processing.
- Designed and developed **RESTful APIs** and web services with CRUD operations, tested using **Postman**, with validation and structured error handling.
- Applied **design patterns** and layered architecture to keep the codebase maintainable and testable.
- Built real-time product search and filtering features, strengthening independent, end-to-end feature ownership skills.

TRAINING EXPERIENCE

Software Engineer Trainee (.NET) — *HTD Program, TekPyramid (Client: Capgemini)* June 2024 – Nov 2024

- Completed an intensive Hire-Train-Deploy (HTD) program focused on **Microsoft .NET** application development.
- Designed and developed a Tour Management System product with Tours, Packages, Tourists, and Guides modules.
- Received hands-on training in **C#**, **ASP.NET / ASP.NET Core**, and **SQL Server** within a sprint-based evaluation model simulating real product delivery.
- Implemented CRUD operations, business logic, and backend validations following layered architecture, **design patterns**, and clean coding practices.
- Cleared the final technical evaluation and was deployed to Capgemini as a full-time Software Engineer.

EDUCATION

Bachelor of Technology (B.Tech) — *C R Reddy College of Engineering, Eluru, Andhra Pradesh* 2019 – 2023

CGPA: 7.87

Intermediate (Class XII) — *Sri Chaitanya Junior College, Eluru, Andhra Pradesh* 2017 – 2019

CGPA: 9.82

AWARDS & RECOGNITION

- **GEM Award** and **Client Appreciation Award** — for stabilizing critical USPTO integrations and improving system reliability.
- **Capgemini WOW Award** — for consistent delivery and quality contributions.
- **Client Product Team Appreciation** — for effective contributions to feature development and strong delivery ownership.
